FEATURE: SHOP OPENING/CLOSING SCHEDULE + AUTOMATIC SHOP STATUS

Create a new page in the Shopkeeper Dashboard called "Shop Timing & Schedule".

1. Opening and Closing Time Table

Add a professional, editable weekly schedule table with the following columns:

Day| Opening Time| Closing Time| Shop Status
Monday| 10:00 AM| 10:00 PM| ON
Tuesday| 10:00 AM| 10:00 PM| ON
Wednesday| 10:00 AM| 10:00 PM| ON
Thursday| 10:00 AM| 10:00 PM| ON
Friday| 10:00 AM| 10:00 PM| ON
Saturday| 10:00 AM| 10:00 PM| ON
Sunday| 10:00 AM| 10:00 PM| ON

- Allow shopkeepers to edit opening and closing times for each day.
- Add an ON/OFF toggle for each day.
- Allow different timings for different days.
- Add a Save Schedule button.

2. Automatic Opening and Closing

Automatically change shop status according to the saved schedule.

- At 10:00 AM, automatically open the shop.
- At 10:00 PM, automatically close the shop.
- If a shopkeeper changes the schedule, apply the new timings automatically.
- Customers must see the correct LIVE shop status.
- Closed shops must not accept new orders.

3. Special Late-Night Order Confirmation

If an order arrives near closing time, for example at 9:30 PM, show a confirmation notification to the shopkeeper:

"A new order has arrived near closing time. Can you deliver it today?"

Provide two buttons:

- YES, Deliver Today.
- NO, Deliver Tomorrow.

If YES:

- Allow the shopkeeper to confirm the expected delivery time.
- Show the confirmed delivery time to the customer.

If NO:

- Automatically schedule the order for tomorrow.
- Ask the shopkeeper to enter the expected delivery time for tomorrow.
- Notify the customer about the updated delivery schedule.

4. Customer-Side Shop Status

Display:

- OPEN – Accepting Orders.
- CLOSED – Opens Tomorrow at 10:00 AM.
- CLOSED – Opens Today at the scheduled opening time.

Do not allow customers to place orders when a shop is closed.

5. Important Requirements

- Save all opening and closing schedules permanently.
- Use the shop's local Indian Standard Time (IST).
- Automatically update shop status even if the shopkeeper closes the app.
- Maintain the existing manual ON/OFF shop availability feature.
- Allow the shopkeeper to temporarily close or open the shop manually, subject to the admin's settings.
- Manual changes must not permanently overwrite the saved weekly schedule.
- Ensure order notifications, expected delivery times and shop status remain synchronized.

IMPORTANT: Do not redesign the existing FlashDrop application. Do not change its logo, colours, navigation, existing dashboard, customer interface or other features. Only add this new Shop Timing & Schedule page and integrate it with the existing ordering system.
